

HEAD INJURY INSTRUCTIONS:

- ❖ Although your child may exhibit no problems now, anyone with a head injury must be watched closely for 24-72 hours.

CONTACT YOUR DOCTOR OR EMERGENCY DEPARTMENT IMMEDIATELY IF YOU NOTICE ANY OF THE FOLLOWING SYMPTOMS:

- ❖ Severe headache which continues, and seems to be in the same place
- ❖ Anxiety, confusion, drowsiness, or other unusual behavior
- ❖ Nausea or vomiting, especially forceful vomiting
- ❖ Dizziness, difficulty walking, loss of coordination
- ❖ Blurred, double, or loss of vision, or pupils are of unequal size
- ❖ Seizures, or any part of body twitching or jerking
- ❖ Bleeding, or other discharge from ears, nose, or mouth

Outside of your child's normal sleep times, it is recommended to awaken him/her periodically to check for normal behaviors. Please keep this information for reference.

On rare occasions, a child will suffer complications up to two weeks after an injury.
